

Project Care

I am a 63 year old single man who is a diabetic; the primary drug I use to control my blood sugar is Lantus. About a year ago I lost my insurance and drug coverage, so I have been purchasing my Lantus out of my pocket. The cost per bottle at a local Wal-Mart pharmacy is \$107.00 per bottle. I use a bottle every three weeks. My other option has been to drive to Fort Frances, Ontario and purchase Lantus at a cost of \$65.00 per bottle.

I was told by a friend about Project Care and stopped in on a late Thursday afternoon and met Carrie Estey-Dix, who helped me obtain a grant of a 1 year supply of Lantus through the company that makes and distributes the product.

I cannot thank "Project Care" and Carrie Estey-Dix enough for this tremendous help.
